

PRESTON INNOVATIONS FLOATS

At Preston Innovations we not only realise the importance of high quality floats but also that those qualities change with the function of the float or the species being fished for, this is why we are constantly working with our suppliers to develop new patterns to suit the constantly changing requirements of you the angler.

We have specific ranges of float which all cater to different needs. PB Inter floats have been manufactured after careful consultation with Des Shipp the range incorporates some of his favourite patterns, many suited to commercial carp fishing there are several features which are common across the range, to make tips brighter and easier to see in difficult light conditions the nylon tips have been painted as well as being coloured, the paint finish has been made tougher to lessen the effects of line damage to the floats body, we have also used high grade carbon and wire in their construction and strengthened the glue used to hold the eyes and stems in place traditional weak points on any float. Preston colours floats are an all round series of floats which cater to all different styles of fishing from deep still and moving waters down to shallow fishing on commercial venues many of the popular patterns are also available on quality ready tied rigs making them ideal for the angler for whom time is at a premium. PB Carp range is a small range for commercial carp fishing, they have dura float construction

with the glass stems fitting inside the hollow tips this makes these floats extremely strong and ideally matched to the rigours of match carp fishing as the last thing you need when you are on your way to a big weight is for your float to fail. Dura floats are just about as strong as its possible to make a float, we feel that we have been able to eliminate just about all the potential weak spots by gluing the stems inside the hollow plastic bristles, we have also completely removed eyes from the Dura patterns and used a spring which is attached to the bristle making these floats practically indestructible in use. Magic floats have been designed in conjunction with our Dutch consultants and Des Shipp who regularly fish large rivers and still waters where the delicate presentation of natural baits is required some of these are also available as pre tied rigs incorporating the highest quality components making these floats accessible to everyone even those with limited time to spend on their gear. We also produce a large range of pellet wagglers suitable for many different situations, we have developed wagglers with loadings and unloaded designs to suit personal preferences, insert tips for when bites are shy and super buoyancy foam wagglers with cane through to make them as strong as possible for bagging situations. The range also features some high quality peacock wagglers and wire stemmed stick floats for the traditionalists amongst you.

Oval Profile

Oval shaped bodies are the most versatile shape and can be used in lots of different conditions. They are very stable and can be held still in medium and fast flows, lifted to work the bait and turn around the body when fishing on-the-drop.

Body Down Profile

Very stable floats for stillwater and slow moving water fishing, especially in rough conditions. Depending on the size of tip and body taper this shape of float can be used for fine bloodworm fishing or for carp fishing on-the-deck.

Slim Profile

Slim bodies are usually found on smaller floats designed for on-the-drop fishing as they turn slowly and follow the line of the bait. A good shape for fine canal fishing where there is little tow and the bait needs to be lifted and worked.

PRESTON WAGGLERS

There are two distinct ranges of Preston running line floats. For commercial carp waters there are pellet wagglers that are designed for fishing pellets and other large baits. Peacock wagglers and a new splasher waggler. Some of the models are loaded and some unloaded to suit anglers' preference. The 'silver fish' float range covers over 90% of the running line styles in use on rivers and lakes in the UK. All Preston floats are made from the finest materials and finished to perfection.

UNLOADED PELLET WAGGLERS

Supplied complete with a Preston adapter to make changing floats quick and easy, the Unloaded Pellet Wagglers allow you to alter the shooting according to the conditions, dotting it right down if conditions dictate.

SIZES AVAILABLE			
4g	6g	8g	10g

POLY WAGGLERS

Made from an ultra lightweight and buoyant foam, these unloaded pellet wagglers have cane all the way through the body to make them more durable. Perfect for fishing shallow with big baits or pellets.

NEW

SIZES AVAILABLE					
2g	3g	4g	5g	6g	8g

SPLASHER WAGGLERS

Correctly loaded, these new Splasher Wagglers have a double body design that prevents the float diving too deep on the cast and increases the splash when it lands. A polycarbonate stem provides the strength required when casting continually.

NEW

SIZES AVAILABLE				
10g	12g	14g	16g	18g

PRESTON WAGGLER

Designed for fishing large continental waters, the Preston Waggler come in two models - Sensitive and Distance. The smaller Sensitive model features a long carbon stem with a high visibility tip whilst the larger Distance model has a shorter stem. Both models are pre-loaded for accurate casting.

SIZES AVAILABLE			
SENSITIVE	4g	6g	8g
DISTANCE	10g	12g	14g

PRESTON SLIDER

The Preston Slider has been designed for deep water fishing. Available in two versions the Sensitive models are lighter and more suited to close work. The Distance versions are larger. Both have interchangeable stems and tips for the perfect set-up.

SIZES AVAILABLE			
SENSITIVE	2 + 3g	2 + 4g	2 + 6g
DISTANCE	2 + 8g	2 + 10g	2 + 12g

SHOULDERED STICK FLOATS

Available in 8 sizes from 4 x 4 up to 12 x 4 the Shouldered Stick Floats have a pronounced shoulder and a tapered tip. They hold back better than the Domed version and are stable which makes them excellent for deeper swims.

WAGGLER ADAPTORS

The soft plastic Waggler Adaptor is designed for attaching loaded floats without the need for shot.

BIG FLOAT WAGGLER ADAPTORS

Designed for use with loaded splasher wagglers where locking shot aren't required. This version has a metal stem and copes well with repeated casting.

LOADED INSERT PELLET WAGGLER

Incorporating an insert, these wagglers combine the attractive splash with increased sensitivity offered by an insert. Ideal for shy fish. The loading makes them suitable for use with Preston Waggler Adaptors as no additional loading is required.

SIZES AVAILABLE		
4g	6g	8g

LOADED DUMPY PELLET WAGGLERS

Made with a dumpy body to create a splash and to help stop the float diving. The thick tip is easy to see and prevents the float diving under from false bites and line bites.

SIZES AVAILABLE		
4g	6g	8g

INSERT PELLET WAGGLERS

Incorporating an insert, these wagglers combine the attractive splash with the increased sensitivity offered by an insert. Provided with a quick change silicone adapter.

SIZES AVAILABLE		
4g	6g	8g

INSERT PEACOCK WAGGLERS

Insert Peacock Waggler are ideal for fishing on the drop, or in harder conditions when a more sensitive approach is required. These high quality floats are made from straight peacock quill with sensible length inserts.

NEW

SIZES AVAILABLE			
2AAA	3AAA	4AAA	5AAA

THICKER PEACOCK WAGGLERS

Made from high quality peacock, these waggler are ideal for supporting bigger baits like meat when fishing up in the water. They are also perfect for fishing moving water when line needs to be laid on the bottom to slow the bait down.

SIZES AVAILABLE				
2AAA	3AAA	4AAA	5AAA	6AAA

PEACOCK WAGGLERS

Using the best quality peacock and beautifully finished these 'arrow straight' floats are extremely well-made - a waggler is a waggler? Not quite - if you use one you might as well use a good one!
